

Standard Diagnostics

Eval for immediately reversible disease

H&N CTA/MRA

OR

Carotid, Vertebral and Trans-cranial Doppler (TCD)

Brain MRI

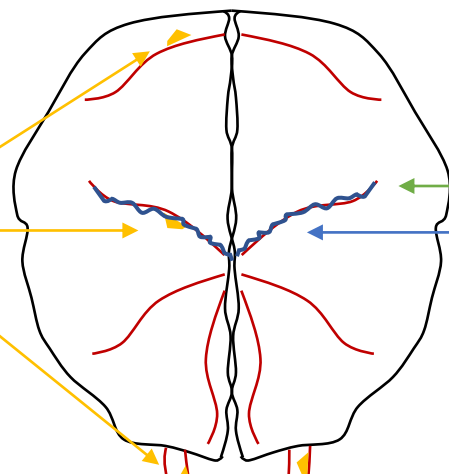

Eval for cardioembolic disease

Telemetry

GFR >45

GFR <45

Determining Ischemic Sub-Type

Ongoing evaluation for possible embolic disease

TCD emboli monitoring and/or TCD shunt study

Eval for other etiologies (e.g. vasculitis, thrombophilia)

Black Blood Brain MRI

Lumbar puncture

Angiogram

TEE

Thrombophilia Evaluation

TTE w/ Bubble

LE Duplex
